MAGNAFLEX

Magnetic Basing System

Magnaflex is a self adhesive magnetic basing system. When applied to figure bases, they can be transported safely upright. Like all magnets, "Magnaflex" will stick to iron and steel compounds.

Other storage boxes can be made adhesive to magnets using "Ferro sheeting". This flexible, self adhesive sheet can be stuck into file boxes, etc. to make a super-strong bond with magnaflex.

All magnaflex products can easily be cut with scissors or a modelling knife.

0.75mm thickness strips

All strip packs contain 2.4 metres. Sheet pack contains two 150 x 200 mm sheets.
